

The logo for ROIABLE features a blue circle on the left, partially overlapping a stylized black 'R'. The 'R' has a curved top that extends upwards and to the right, resembling a checkmark or a refresh symbol. To the right of this symbol, the word "ROIABLE" is written in a bold, black, sans-serif typeface.

INSTANT FRESH LOOK FOR YOUR SAP IDM

# IDM UX

## INSTANT FRESH LOOK FOR YOUR SAP IDM

### 01 – Immediate switch to Fiori

Forget about having to choose between good UX and budget solutions. No need for complex developments and never-ending projects. The IdM UX is available immediately, here and now. Just deploy and run, as easy as plug & play!

### 02 – Increased end user adoption

Dealing with old user interfaces, which are not available on any device and offering far from the optimal user experience might drive end users away from any solution. Don't be among the underdogs, be modern, be innovative, stay actual, switch to Fiori!

### 03 – Available in the cloud and on-premise

Empower the people who drive your business to be more effective by not losing precious time in tedious self-service and approval tasks over VPN connections. Simplify their day-to-day activities and enjoy the benefits of their increased productivity today!

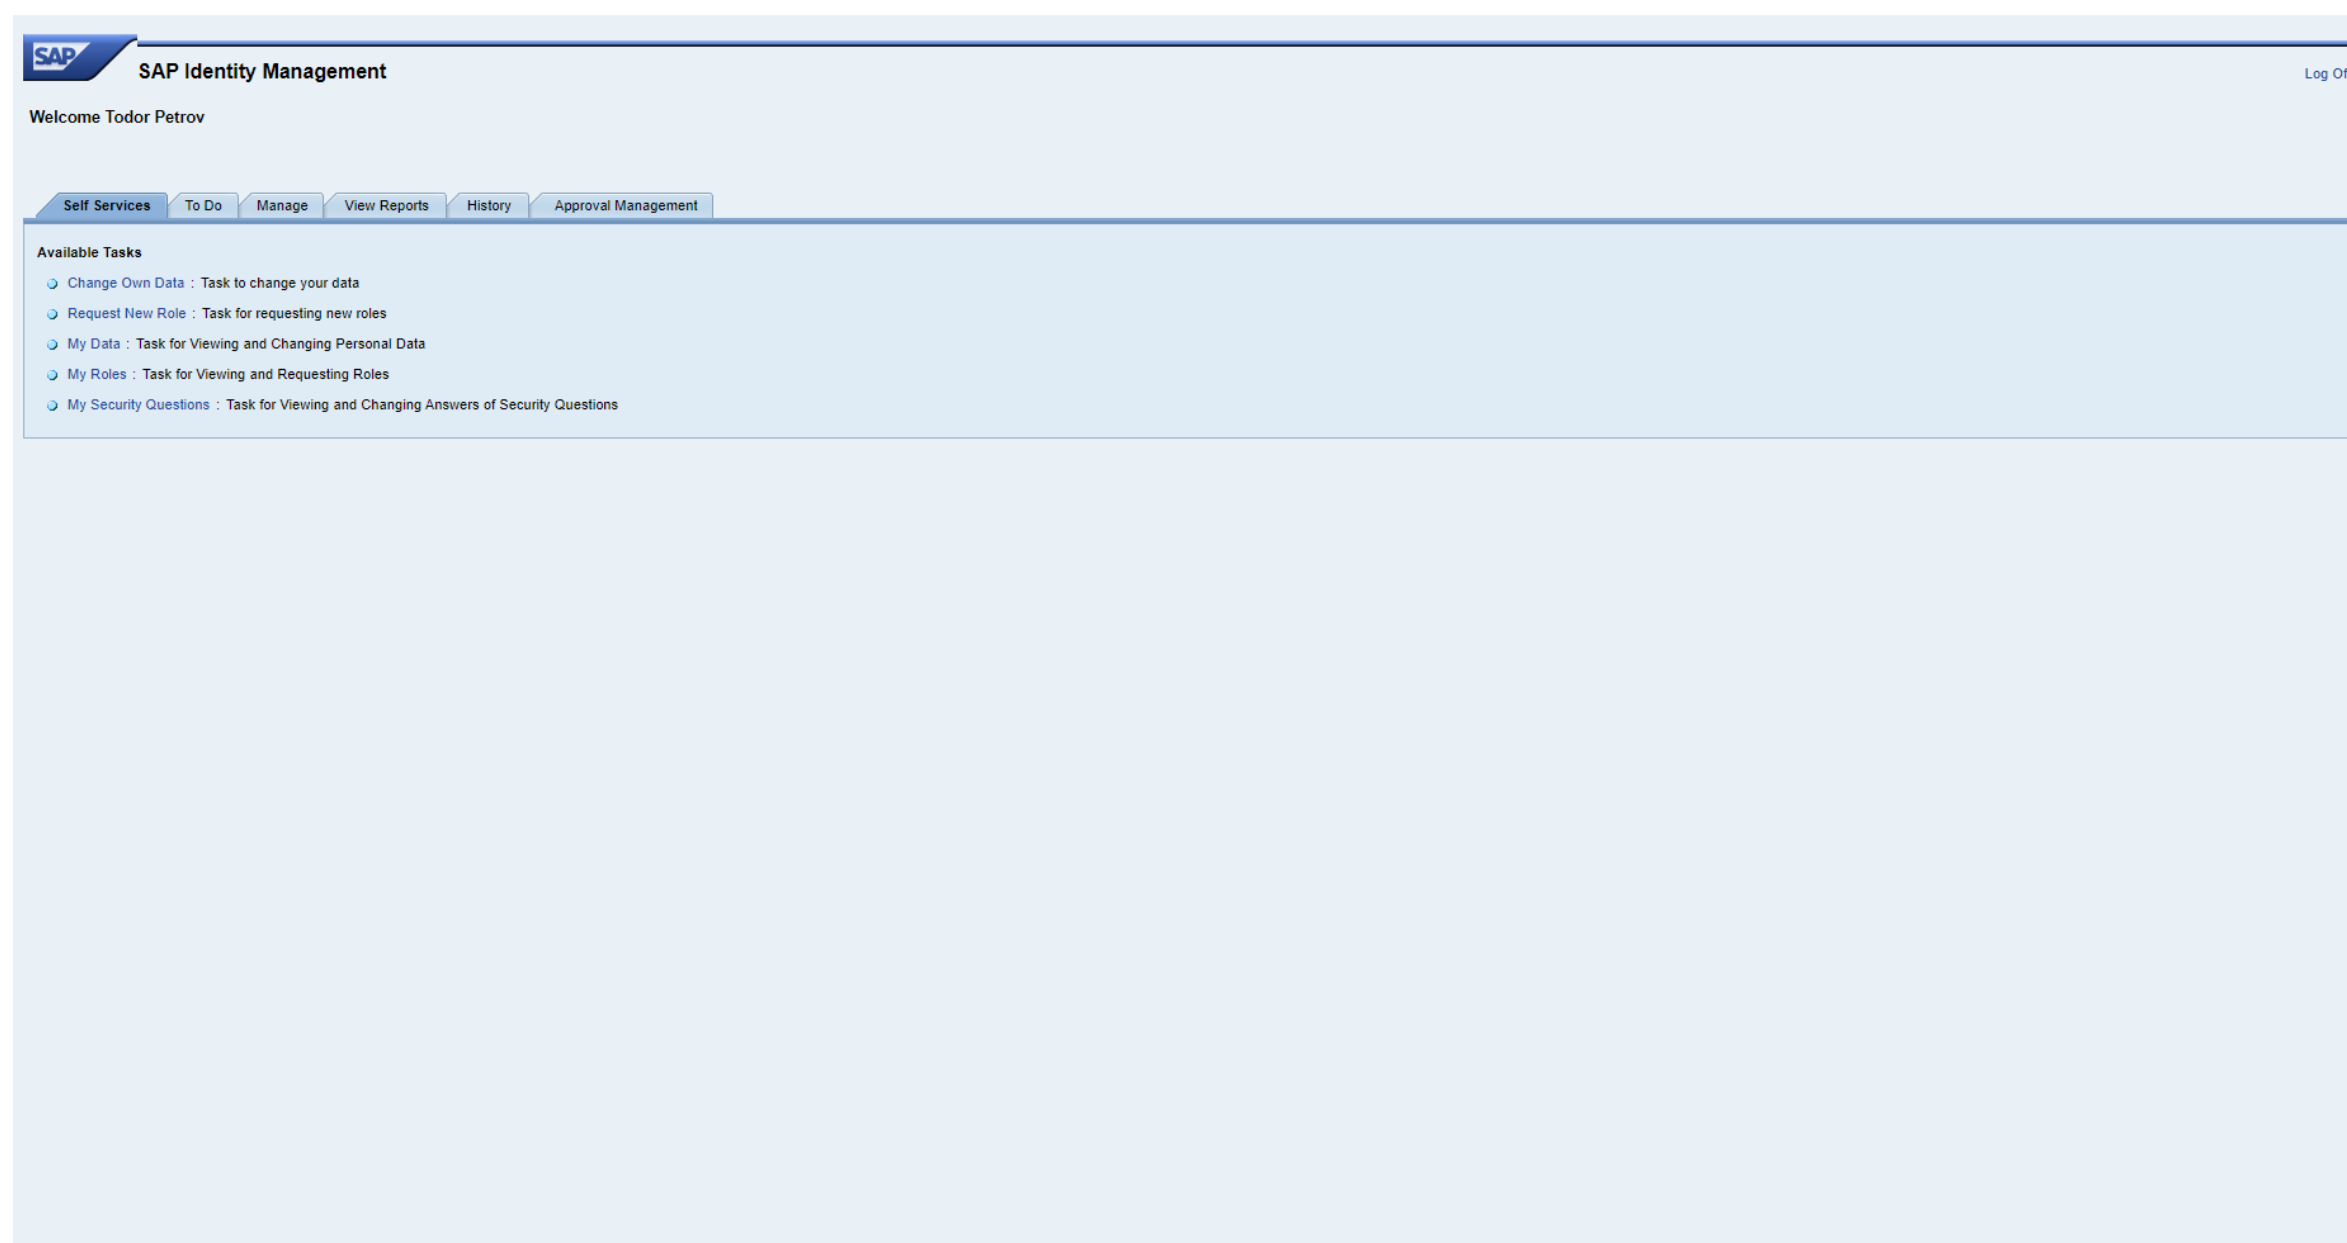

### 04 – Knowledge sustainability

New solutions require new personnel trainings. Often, they come with lengthy user guides and adaptation periods. Look at how IdM UX fits seamlessly in everyone's daily routine without a single day of training. It simply follows the same work patterns established by the standard SAP IdM UI, so you can get started immediately!
